About me

As a junior Fullstack web developer, with a background in Environmental and Sanitary Engineering, I have acquired valuable technical skills that enable me to offer ideas and solutions to meet diverse software requirements. I excel in the areas of communication, leadership, and teamwork, which are crucial skills for effectively collaborating with others in a development team.

Experience

AUGUST 2023 - CURRENT

FULL STACK DEVELOPER / Prospect Ratings - United States

- I develop unit and integration tests to ensure the reliability and functionality of our company's web pages. I actively identify, report, and address software bugs to uphold the quality of our web applications. Additionally, I continuously optimize and modularize existing code to enhance maintainability and scalability.

JUNE 2023 - AUGUST 2023

FULL STACK DEVELOPER / Aythen - Spain

- Implement the Scaleway cloud services in the application. I have created the endpoints and the logic to use the services through the developers API, save the relevant information in the database and send the appropriate responses to the client to be handled. Also developed the backend logic for file upload to the Scaleway Object Storage. In the frontend I have written the logic to render and process the information using react and redux toolkit.

APRIL 2023 - MAY 2023

FULL STACK DEVELOPER / BAIT - Argentina (academic)

- I worked on a website that enables users to find the best restaurants in their city based on reviews from other users. In the backend I used Sequelize to make queries to the PostgreSQL database and used JavaScript to define routes, controllers and middlewares for the reviews CRUD. In the front end of the app I used React, Redux and JavaScript to control forms, connect the Menu-Dishes CRUD and manage the answers from the back end. I helped my team to follow the steps needed to achieve our goal.

Education

CURRENTLY

Cloud computing - Amazon Web Services

UBITS - Nexa

JANUARY 2023 - MAY 2023

FullStack Web Developer

Bootcamp SoyHenry

FEBRUARY 2021 - OCTOBER 2021

Software Development

Universidad Tecnológica de Pereira

JULY 2011 - SEPTEMBER 2017

Environmental And Sanitary Engineer

Universidad del Magdalena

Hard Skills

- JavaScript
- HTML5
- CSS3
- Node
- Express
- React
- Redux
- PostgreSQL
- Sequelize / Drizzle
- MongoDB
- Mongoose
- TypeScript
- Testing
- Git
- GitHub

Soft skills

- Critical thinking.
- Detail oriented.
- Assertive communicator.
- Teamwork.
- Leadership.
- Flexible.
- Self-taught.

Languages

- Spanish - Native
- English - C1.
