WORK EXPERIENCE

FULL STACK DEVELOPER   2023
BAIT I Argentina (academic)

I worked on a website that enables users to find the best restaurants in their city based on reviews from other users. In the backend I used sequelize to make queries to the PostgreSQL database and used JavaScript to define routes, controllers and middlewares for the reviews CRUD. In the front end of the app I used React, Redux and JavaScript to control forms, connect the Menu-Dishes CRUD and manage the answers from the back end. I helped my team to follow the steps needed to achieve our goal.

FULL STACK DEVELOPER   2023
Dirty Paws l Henry (academic)

I developed a responsive and minimalist website that consumes The Dog API and allows users to add new dog breeds to the project's database and find the dog breed that best fits their lifestyle.

I used the stack PERN to build the project. In the front end I used React, Redux, JavaScript and CSS modules. In the back end I used Node, Express, Sequelize and PostgreSQL.

UX / UI Designer   2021
Ferretería Carvajal Materiales SPA l Universidad Tec. de Pereira

I participated in the development of an SPA with the STACK MERN. I worked in writing the user stories, collecting documentation and structuring the responsive web design. I used Bootstrap and CSS to build a modern user-friendly interface.

ESL TEACHER   2019 - Current
Colegio IDPHU Bilingüe - English4Kids

II have been working as an English teacher for almost four years, which has allowed me to improve my English-speaking skills and develop soft skills such as leadership, dynamism, flexibility, emotional intelligence and assertive communication.

INTERESTS

Music
Choral singing, violin playing

Language learning
Self-taught English speaker

ABOUT ME

As a junior Fullstack web developer, with a background in Environmental and Sanitary Engineering, I have acquired valuable technical skills that enable me to offer ideas and solutions to meet diverse software requirements. I excel in the areas of communication, leadership, and teamwork, which are crucial skills for effectively collaborating with others in a development team.

EDUCATION

FullStack Web Developer
Henry
2023

Software Development
Universidad Tecnológica de Pereira
2021

Environmental Engineer
Universidad del Magdalena
2011 - 2017

SKILLS

- ReactJS, Redux
- JavaScript
- Node JS, Express
- SQL, PostgreSQL, Sequelize
- CSS, Bootstrap
- Communication, teamwork, attention to detail.
